

Install MSSQL on Windows Server Core

```
Setup.exe /QS /ACTION=Install /FEATURES=SQL,Replication,IS  
/INSTANCENAME=MSSQL /SQLSVCACCOUNT="NT Authority\System"  
/SQLSYSADMINACCOUNTS="VK7\Administrator" /AGTSVCACCOUNT="NT  
AUTHORITY\Network Service" /SECURITYMODE=SQL /SAPWD="SA_PASSWORD"  
/TCPENABLED=1 /IACCEPTSQLSERVERLICENSETERMS
```

To view the installation wizard on server Core:

```
setup.exe /UIMODE=EnableUIonServerCore
```

Enable Windows Firewall to Allow SQL Server Traffic

```
C:\> netsh advfirewall firewall add rule name="SQL Server 1433" dir=in  
action=allow  
protocol=TCP localport=1433
```
