Manage MySql users

Create user

```
CREATE USER 'newuser'@'%' IDENTIFIED BY 'password';
```

Grant privileges

```
-- Grant all privileges including the grant option (basically an
additional root user)
GRANT ALL PRIVILEGES ON * . * TO 'newuser'@'%' WITH GRANT OPTION;

-- Grant all privileges
GRANT ALL PRIVILEGES ON * . * TO 'newuser'@'%';

-- Grant read-only privileges
GRANT SELECT ON *.* TO 'newuser'@'%';
```

Flush privileges

```
FLUSH PRIVILEGES;
```

Change password

```
SET PASSWORD FOR 'user'@'localhost' = 'NewPassword';
```

If MySql server is accessible from network, limit users access from local lan by using 10.0.0.% instead of just %, or enter a specific IP address

```
sudo vim /etc/mysql/mysql.conf.d/mysqld.cnf

in [mysqld] section, add:
mysql_native_password=ON
```

```
ALTER USER 'username'@'ip_address' IDENTIFIED WITH mysql_native_password BY
'password';
```
