Cross-Origin Request Blocked

For Microsoft IIS7, merge this into the web.config file at the root of your application or site:

```
<?xml version="1.0" encoding="utf-8"?>
<configuration>
 <system.webServer>
   <httpProtocol>
     <customHeaders>
       <add name="Access-Control-Allow-Origin" value="*" />
     </customHeaders>
   </httpProtocol>
 </system.webServer>
</configuration>
```

For Apache

Via .htaccess

```
<IfModule mod_headers.c>
    Header set Access-Control-Allow-Origin "*"
</IfModule>
```

Or set correct headers into the response header of the requested file, you will allow everyone to access the ressources:

```
Access-Control-Allow-Origin : *

or

Access-Control-Allow-Origin : http://www.my-domain.com
```
