

Cross-Origin Request Blocked

For Microsoft IIS7, merge this into the web.config file at the root of your application or site:

```
<?xml version="1.0" encoding="utf-8"?>
<configuration>
  <system.webServer>
    <httpProtocol>
      <customHeaders>
        <add name="Access-Control-Allow-Origin" value="*" />
      </customHeaders>
    </httpProtocol>
  </system.webServer>
</configuration>
```

For Apache

Via .htaccess

```
<IfModule mod_headers.c>
  Header set Access-Control-Allow-Origin "*"
</IfModule>
```

Or set correct headers into the response header of the requested file, you will allow everyone to access the resources:

```
Access-Control-Allow-Origin : *
```

or

```
Access-Control-Allow-Origin : http://www.my-domain.com
```
