

Fixing Viber notification icon position on Ubuntu

When I installed Viber on my Ubuntu 14.04 box, i noticed that the notification icon is in the upper-left corner. I wouldn't mind, but i couldn't close any maximized window.

Here is how you fix this issue. Simply add run this in console

```
sudo apt-add-repository ppa:gurqn/systray-trusty  
sudo apt-get update  
sudo apt-get upgrade
```

New solution:

```
sudo add-apt-repository ppa:nilarimogard/webupd8  
sudo apt-get update  
sudo apt-get install viberwrapper-indicator
```
