

Add to beginning or end of line with notepad++

Follow these steps:

1. Press **Ctrl+H** to bring up the Find/Replace Dialog.
2. Choose the **Regular expression** option near the bottom of the dialog.

To add a word, such as test, at the beginning of each line:

1. Type **^** in the **Find what** textbox
2. Type **test** in the **Replace with** textbox
3. Place cursor in the first line of the file to ensure all lines are affected
4. Click **Replace All** button

To add a word, such as test, at the end of each line:

1. Type **\$** in the **Find what** textbox
2. Type **test** in the **Replace with** textbox
3. Place cursor in the first line of the file to ensure all lines are affected
4. Click **Replace All** button
