Automatic Logon on Windows 7

1. Click Start, type **netplwiz**, and then press Enter.
2. In the User Accounts dialog box, click the account you want to automatically log on to.If it is available, clear the **Users Must Enter A User Name And Password To Use This Computer** check box.
3. Click OK.
4. In the Automatically Log On dialog box, enter the user's password twice and click OK.
