

Prevent Windows 10 from adding EN_US keyboard

Windows 10 will add EN_US keyboard from time to time, even if you uninstalled it. Solution:

1. Create a **DWORD** key named **IgnoreRemoteKeyboardLayout** inside **HKEY_LOCAL_MACHINE\SYSTEM\CurrentControlSet\Control\Keyboard Layout** and give it a value of **1** (decimal).
2. Uninstall the undesired keyboard
3. Reboot

Remove legacy reg key

```
reg delete "HKEY_USERS\.DEFAULT\Keyboard Layout\Preload" /f
```

Or modify the Preload list with these codes:

<https://learn.microsoft.com/en-us/windows-hardware/manufacture/desktop/windows-language-pack-default-values?view=windows-11>
