Grant Log on as a service privilege

o add the “Log on as a service” right to an account for a Group Policy object, when you are on a server that is joined to a domain or a domain controller

- Click **Start**, point to **Run**, type mmc, and then click **OK**.
- On the **File** menu, click **Add/Remove Snap-in**.
- In **Add/Remove Snap-in**, click **Add**, and then, in **Add Standalone Snap-in**, double-click **Group Policy Object Editor**.
- In **Group Policy Object**, click **Browse**, browse to the Group Policy object (GPO) that you want to modify, click **OK**, and then click **Finish**.
- Click **Close**, and then click **OK**.
- In the console tree, click User Rights Assignment.
- Where?
    - GroupPolicyObject [ComputerName] Policy
    - Computer Configuration
    - Windows Settings
    - Security Settings
    - Local Policies
    - User Rights Assignment
- In the details pane, double-click **Log on as a service**.
- If the security setting has not yet been defined, select the **Define these policy settings** check box.
- Click **Add User or Group**, and then add the appropriate account to the list of accounts that possess the **Log on as a service** right.
