Create DNS records with PowerShell

Add cName record:

```
add-dnsserverresourcerecordcname -ComputerName "ad01" -ZoneName "example.com" -Name "test-cname" -HostNameAlias "ftp.example.com." -CreatePtr
```

Add A record:

```
 Add-DnsServerResourceRecordA -ComputerName "ad01" -ZoneName "example.com" -Name "test-ipv4" -IPv4Address "10.0.0.10" -CreatePtr
```

Add AAAA record:

```
Add-DnsServerResourceRecordAAAA -ComputerName "ad01" -ZoneName "example.com" -Name "test-ipv6" -IPv6Address "ff::ff"
```
