

Mount a directory via SSH to a local drive letter (using keys)

c:\users\user\.ssh\config

```
Host TargetHost
  HostName host.example.com
  User root
  Port 22
  IdentityFile C:\Users\user\.ssh\user-priv-key
```

Install WinFsp and SSHFS-Win

```
winget install -h -e --id "WinFsp.WinFsp" ; winget install -h -e --id "SSHFS-Win.SSHFS-Win"
```

Mount directory

```
C:\Program Files\SSHFS-Win\bin\sshfs-win.exe svc \sshfs.k\TargetHost\..
x:
```
