Hyper-V Replica

Enable firewall HTTP listener

```
netsh advfirewall firewall set rule name="Hyper-V Replica HTTP Listener (TCP-In)" new enable=yes
```

Planned failover

Primary host

```
$PrimaryVM1 = “Core”
Stop-VM $PrimaryVM1
Start-VMFailover -VMName $PrimaryVM1 –prepare
```

Secondary host

```
$ReplicaVM1 = “Core”
Start-VMFailover -VMName $ReplicaVM1
Start-VM $ReplicaVM1
```

Reverse replication

```
Set-VMReplication -reverse -VMName $ReplicaVM1
```
