

# Hyper-V Replica

## Enable firewall HTTP listener

```
netsh advfirewall firewall set rule name="Hyper-V Replica HTTP Listener (TCP-In)" new enable=yes
```

## Planned failover

### Primary host

```
$PrimaryVM1 = "Core"  
Stop-VM $PrimaryVM1  
Start-VMFailover -VMName $PrimaryVM1 -prepare
```

### Secondary host

```
$ReplicaVM1 = "Core"  
Start-VMFailover -VMName $ReplicaVM1  
Start-VM $ReplicaVM1
```

### Reverse replication

```
Set-VMReplication -reverse -VMName $ReplicaVM1
```
