# Move DHCP server

To move a DHCP server from one server to another, weather it be windows Server 2000, 2003, 2008, 2008 R2 or 2012.

One the Source server export the DHCP configuration

```
netsh dhcp server export C:\dhcp.txt all
```

copy the dhcp.txt file to the new server and then run the following command to import the configuration.

```
netsh dhcp server import c:\dhcp.txt all
```
