Access Exchange shared mailbox in thunderbird

Exchange Configuration

```
USER EMAIL: user@maindomain.com
PASSWORD: password
SHARED MAILBOX: shared@anotherdomain.com      (could also be
@domain.com, of course)
SHARED MAILBOX ALIAS: shared-mailbox
```

Note: Please make sure to create the **UNIQUE alias** always with the mailbox, because it creates the user **[alias]@maindomain.com**. In this case **shared-mailbox@maindomain.com**

Settings for IMAP Configuration

```
EMAIL ADDRESS: shared@anotherdomain.com (shared mailbox)
IMAP SERVER: outlook.office365.com
SMTP SERVER: smtp.office365.com
USERNAME: user@maindomain.com\shared-mailbox  (user\shared mailbox
alias)
PASSWORD: password (user's password)
```

SMTP Login Is Different

```
USERNAME: user@maindomain.com  (users email)
PASSWORD: password (user's password)
```
