

Address books and address lists in exchange

```
New-GlobalAddressList -Name Example_Global -ConditionalCompany
@{Add="Example ltd"} -IncludedRecipients AllRecipients
Update-GlobalAddressList Example_Global

New-OfflineAddressBook -Name Example_Offline -AddressLists Example_Global
Update-OfflineAddressBook Example_Offline

New-AddressList -Name Example_People -RecipientFilter "((Company -eq
'Example ltd') -and (RecipientType -eq 'UserMailbox'))"
New-AddressList -Name Example_Rooms -RecipientFilter "((Company -eq 'Example
ltd') -and (((RecipientType -eq 'UserMailbox') -and (ResourceMetaData -like
'ResourceType:*') -and (ResourceSearchProperties -ne $null))))"
Update-AddressList Example*

New-AddressBookPolicy Example -GlobalAddressList Example_Global -RoomList
Example_Rooms -AddressLists Example_People -OfflineAddressBook
Example_Offline

Set-MailBox -Identity "user" -AddressBookPolicy Example
```

Before deleting the policy, check who uses the policy

```
Get-Mailbox | select Name,AddressBookPolicy
```
