

Move mailboxes between databases in exchange

Create new database

```
New-MailboxDatabase -Name "db02" -EdbFilePath  
"D:\Databases\db02\db02.edb" -LogFolderPath "E:\Logs\db02" -Server  
"exchange01.example.com"
```

List all mailboxes in database

```
Get-Mailbox  
Get-Mailbox -Database db01 -Arbitration | get-mailboxstatistics |  
select displayname, totalitemsize, database  
Get-Mailbox -Database db01 -Archive | get-mailboxstatistics | select  
displayname, totalitemsize, database  
Get-Mailbox -Filter { WindowsEmailAddress -like "*@example.com" }
```

```
New-MoveRequest mailboxname -TargetDatabase db02  
get-moverequest | get-moverequeststatistics  
Get-MoveRequest | where { $_.status -eq "Completed" } | Remove-MoveRequest
```
