Move database and log folder path in Exchange 2013 using PowerShell

Get current location

```
Get-MailboxDatabase | fl Name,EdbFilePath,LogFolderPath
```

Get current location

```
Get-MailboxDatabase "DatabaseName" | FL Name,*Path*
```

Move

```
Move-Databasepath "DatabaseName" –EdbFilepath
"C:\Newlocation\DBname.edb" –LogFolderpath "C:\Newlocation"
```
