

# Fixed header/footer with shadow

If you need a static header on the web page for a menu system, or a static footer for some data (tips perhaps?) to be displayed, here is how.

Header HTML:

```
<div id="header" class="shadeh">content</div>
```

Header CSS:

```
#header {
position:fixed;
left:0px;
top:0px;
height:30px;
width:100%;
background:#999;
}
/* IE 6 */
* html #header{
position:absolute;
top:expression((0-
(footer.offsetHeight)+(document.documentElement.clientHeight ?
document.documentElement.clientHeight :
document.body.clientHeight)+(ignoreMe = document.documentElement.scrollTop ?
document.documentElement.scrollTop : document.body.scrollTop))+ 'px');
}
div.shadeh:after {
content: "";
position: fixed;
top: 0px;
left: 0;
width: 100%;
height: 30px;
-webkit-box-shadow: 0px 0px 10px rgba(0,0,0,.8);
-moz-box-shadow: 0px 0px 10px rgba(0,0,0,.8);
box-shadow: 0px 0px 10px rgba(0,0,0,.8);
z-index: 100;
}
```

Footer HTML:

```
<div id="footer" class="shadef">content</div>
```

Footer CSS:

```
#footer {
position:fixed;
```

```
left:0px;
bottom:0px;
height:30px;
width:100%;
background:#999;
}
/* IE 6 */
* html #footer {
position:absolute;
top:expression((0-
(footer.offsetTop)+(document.documentElement.clientHeight ?
document.documentElement.clientHeight :
document.body.clientHeight)+(ignoreMe = document.documentElement.scrollTop ?
document.documentElement.scrollTop : document.body.scrollTop))+ 'px');
}
div.shadef:after {
content: "";
position: fixed;
bottom: 0px;
left: 0;
width: 100%;
height: 30px;

-webkit-box-shadow: 0px 0px 10px rgba(0,0,0,.8);
-moz-box-shadow: 0px 0px 10px rgba(0,0,0,.8);
box-shadow: 0px 0px 10px rgba(0,0,0,.8);

z-index: 100;
}
```
