Search for files with specific text in them

|Linux shell

```
find /var/www -type f -exec grep -l '/sync-clients/' {} \;
```

This will output all files with the specified string. The path in example is /var/www, and string we search for is /sync-clients/

|Linux shell

```
grep -iRl 'text' .
```

- -i > ignore caps
- -R > recursive
- -l > Display filename instead of text
- 'text' > text to search
- . > location to start in
