

VLANs on CHR under Hyper-V

```
# Insert VM into variable
$vm = Get-VM -Name Mikrotik

# Insert VMs NIC list into variable
$nic = Get-VMNetworkAdapter -VM $vm

# Identify desired NIC
$nic[1]

# Enable MAC Address Spoofing
Set-VMNetworkAdapter -VMNetworkAdapter $nic[1] -MacAddressSpoofing On

# Allow VLANs
Set-VMNetworkAdapterVlan -VMNetworkAdapter $nic[1] -NativeVlanId 0 -
    AllowedVlanIdList "0,1,10,172,666" -trunk
```
